

# PUBLIC NEWS DROID

April, 2024

Here is where your presentation begins

**COURSE CODE : CSE (101)**

**COURSE TITLE : Computer Fundamentals Programming**

**SUBMITTED BY :**

1. Nowrin Akhter Riya ( 23201117)
2. Chowdhury Fatmi Monzur Neha (23201141)
3. Sumiya Jannat Mou ( 23201165)

**SUBMITTED TO :**

**Dr. Nasima Begum**

**Associate Professor , Department Of Computer Science & Engineering.**

# **Table of Contents**

1. Abstract
2. Introduction
3. Motivation
4. Limitation of existing system
5. API
6. Admin Panel
7. Objects
8. Discussion
9. Design and development problem
10. Features
11. System Analysis
12. Problem and statement
13. Identification of News Readers Type
14. Advantages
15. Disadvantages
16. Conclusion

# Abstract

---

As world's technology is rapidly growing we has fast connection and network to instantly connect to instantly connect to other person. Day to day use in mobile, tablets and laptop increasing ,most of the people already have this facilities

# Introduction

---

Public news droid is an advanced & informative system helping the user to know the news, articles or any interesting things happening around their locality.

# Motivations

1. Update with everything around this world.
2. Necessary news are allowed to add minute to minute.
3. Easy to use.
4. Only registered users can view this.
5. Report to the admin if the news is outpoken or not relevant.

# **Limitations of Existing System**

Traditional & even some modern news platforms can be often biased , reflected the subjective views of their owners , editors & the political climate . News may not be accessible to everyone . The rapid dissemination of information has led to challenges in verifying news before it spread widely , contributing to the spread of misinformation & fake news.

.....

## API

API (Application Programming Interface) which is an intermediate interface between different applications . It provides automation , immediacy, adaption & personalizations .

## Admin Panel

This module of app controls the User and Writers logins from database. Writers can add news, update and delete from its database as per required. Writers will only has access to admin panel while Main Admin will has access to database as well.

## Objects

1. Update with everything going his city.
2. The users is allowed to add minute to minute.
3. The news can be viewed only by registered users.
4. Easy to use.

## Discussion

- (1) Mobile news readers can be characterised within three types;
- (2) It is possible to detect user's news reader type from analysis of their interactions with a news app, and;
- (3) Different reader types benefit from different forms of news app interface .

**A picture always reinforces the concept**

## **Design & Development Problem**

1. Operating problem.
2. Debug the mistakes

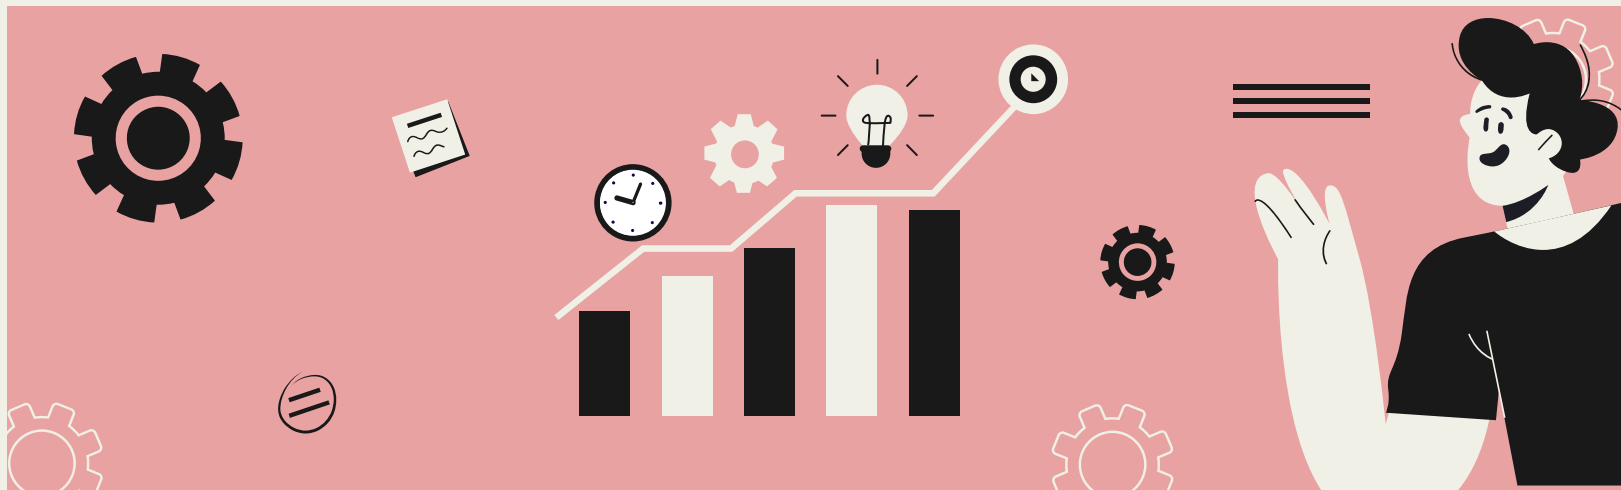

3. Depict a connection.
4. It has a minor mistakes

# 10.

## Features

---

# Features

1. Category wise news.
2. Auto update news.
3. Voice features.
4. Customize notification.
5. Adding comments & articles.
6. Polls for new.
7. Users also published their news.
8. Users can add pictures.

# System Analysis

System analysis is divided into four sections :

1. Initial research and system architecture.
2. Using analytic tools to do structured analysis.
3. Feasibility study.
4. Analyze the cost and benefits.

# Problems & Statement

**PROBLEMS** :The primary goal is to create a droid that can autonomously gather news from various sources , analyze the content for relevance & then disseminate news to the public in an accessible an understandable format. Designing a droid capable of navigating divers terrains & environments.

**SOLUTION** : Incorporate advanced mobility features such as all-terrain wheels or tracks. Utilize GPS & indoor navigation system for location tracking.

# Identification of News Readers Types

<i>Readertypes</i> <i>Clusteringfactors</i>	<b>‘Tracker s’</b>	<b>‘Reviewe rs’</b>	<b>‘Dipper s’</b>
<b>Frequency</b>	Many times aday	Once a day	Less than once a day
<b>Total daily reading</b>	5-10 min	10+ min	0-5 min
<b>Browsing strategy</b>	Both	Through all sections	Particular section
<b>Reading style</b>	Skimmin g	Detail ed readin g	Scannin g
<b>Location</b>	Public Transport	Home	Home

# Advantages

---

- These AI-driven platforms excel in delivering real-time updates.
- They provide a comprehensive overview of current events.

- Multiple channels , catering to different preference & demographics.
- Their efficiency , accuracy & accessibility make them invaluable

- It enhance accessibility by delivering news.

# 15.

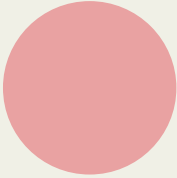

---

## Disadvantages

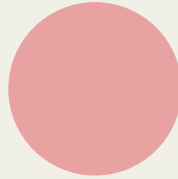

# Disadvantages

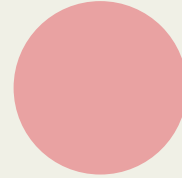

---

1. It requires an active internet connection.

2. Users can add only one pictures per news.  
3. Sometimes it contains virus & also damages the battery.

4. The viewers can not see the news of others cities.

# Conclusion

---

“Public News Droid” is very helpful for the people who are always need a daily latest news in a good way . Pople can be find any information & other essential things within a second .As a result , everybody always gets aware from any danger . It also helpful for the students for finding more interesting news . Overall, “Public News Droid” is very beneficial for all people.

# Thanks!
