ABSTRACT

This report presents the development of the Mental Health Portal, a database system designed to provide students with secure, anonymous, and accessible mental health support. The system organizes information on students, counselors, sessions, evaluations, and institutional programs through a well-structured and normalized relational model. Built using SQL and guided by ER design principles, the database ensures data integrity, reduced redundancy, and efficient retrieval. The implementation demonstrates how a streamlined database can effectively support real-world mental health workflows, confidential communication, and informed decision-making within academic environments.

PROJECT DESCRIPTION

Mental health challenges among students are increasingly prevalent due to academic pressures, personal struggles, and social expectations. Many students, however, hesitate to seek help because of fear, stigma, or financial constraints. The **Mental Health Portal** addresses this gap by providing a secure, anonymous, and accessible platform where students can receive psychological support without exposing their identity.

OBJECTIVES

- Provide an anonymous mental health support system for students.
- Connect students with certified counselors for private therapy sessions.
- Track student progress, session history, and evaluations to monitor improvements.
- Offer discounts or rewards for consistent engagement, funded by NGOs and institutions.
- Promote awareness through organized community programs and workshops.

SCOPE & FUNCTIONALITY

The **Mental Health Portal** is a database-driven system offering students confidential, accessible, and affordable psychological support. Each student receives a unique anonymous ID, enabling private access to counselors, therapy sessions, progress tracking, and post-session evaluations. The portal supports structured care, encourages long-term engagement through discounts and rewards, and hosts awareness programs run by institutions and NGOs to promote mental health literacy. A funding module connects universities with external organizations, keeping

services financially accessible. Overall, the platform provides a secure environment for scheduling sessions, monitoring improvement, receiving professional guidance, and participating in wellness initiatives-all while maintaining privacy and institutional support.

TABLES & ENTITIES

1. Counselor

Stores counselor details and availability.

Counselor	
Counsellor_ID	VARCHAR(10) (PK)
Counsellor_Name	VARCHAR(100)
Qualifications	VARCHAR(100)
Specialisation	VARCHAR(100)
Contact	VARCHAR(20)
Availability	VARCHAR(50)
Email	VARCHAR(50)

➤ Attributes:

- Counselor_Id (Primary Key)
- Name
- Qualification
- Specialisation
- Contact
- Email
- Availability

2. Patient

Stores student/patient information and mental health conditions.

Patient (Student)	
Patient_ID	VARCHAR(10) (PK)
Gender	VARCHAR(10)
Institution_ID	VARCHAR(10) (FK)
Age	INT
MentalHealthCondition	VARCHAR(100)

➤ Attributes:

- PatientID (Primary Key)
- InstitutionID
- Gender
- Age
- MentalHealthCondition

3. TherapySession

Records therapy session details and progress.

Therapy_Session	
Session_ID	VARCHAR(10) (PK)
Patient_ID	VARCHAR(10) (FK)
Counsellor_ID	VARCHAR(10) (FK)
Session_Date	DATE
Session_Type	VARCHAR(50)
Notes	TEXT
Progress_Status	VARCHAR(50)

➤ Attributes:

- SessionID (Primary Key)
- PatientID (Foreign Key)
- CounselorID (Foreign Key)
- SessionDate
- SessionType
- Notes
- ProgressStatus

4. NGO

Stores NGO information and focus areas.

NGO	
NGO_ID	VARCHAR(10) (PK)
NGO_Name	VARCHAR(100)
Focus_Area	VARCHAR(100)
Location	VARCHAR(100)
Contact	VARCHAR(20)

➤ Attributes:

- NGO_ID (Primary Key)
- NGO_NAME
- Focus_Area
- Location
- Contact

5. Institution

Stores institution details and funding contributions.

Institution	
Institution_ID	VARCHAR(10) (PK)
Institution_Name	VARCHAR(100)
Location	VARCHAR(100)
Contact	VARCHAR(20)
Funding_Amount	DECIMAL(10,2)

➤ Attributes:

- Institution_ID (Primary Key)
- Institution_Name
- Location
- Contact
- Funding_Amount

6. Funding

Tracks funding transactions from NGOs to institutions.

Funding	
Funding_ID	VARCHAR(10) (PK)
Institution_ID	VARCHAR(10) (FK)
NGO_ID	VARCHAR(10) (FK)
Amount	DECIMAL(10,2)
Funding_Date	DATE

➤ Attributes:

- Funding_ID (Primary Key)
- Institution_ID (Foreign Key)
- NGO_ID (Foreign Key)
- Amount
- Funding_Date

7. EvaluationForm

Stores feedback and ratings for patients

EvaluationForm	
Evaluation_ID	VARCHAR(10) (PK)
Patient_ID	VARCHAR(10) (FK)
Rating	INT – 1–5 scale
Comments	TEXT

➤ **Attributes:**

- Evaluation_ID (Primary Key)
- Patient_ID (Foreign Key)
- Rating
- Comments

8. Progress

Tracks patient progress and discount eligibility.

Progress	
Progress_ID	VARCHAR(10) (PK)
Patient_ID	VARCHAR(10) (FK)
Progress_Score	DECIMAL(5,2)
Last_Update	DATE
Discount_Eligible	VARCHAR(20)

➤ **Attributes:**

- Progress_ID (Primary Key)
- Patient_ID (Foreign Key)
- Progress_Score
- Last_Update
- Discount_Eligible

9. AwarenessProgram

Stores information about mental health awareness events.

AwarenessProgram	
Event_ID	VARCHAR(10) (PK)
Event_Name	VARCHAR(100)
Event_Location	VARCHAR(100)
Target_Audience	VARCHAR(100)
Counsellor_ID	VARCHAR(10)(FK)
NGO_ID	VARCHAR(10)(FK)

➤ **Attributes:**

- Event_ID (Primary Key)
- Event_Name
- Event_Location
- Target_Audience
- Counselor_ID (Foreign Key)
- NGO_ID (Foreign Key)

RELATION BETWEEN ENTITIES

1. Student – Session:

- **Relationship:** Session
- **Cardinality:** 1 student → many sessions(1:M)
- **Description:** A student can attend multiple counseling sessions.

2. Counselor – Session:

- **Relationship:** Session
- **Cardinality:** 1 counselor → many sessions(1:M)
- **Description:** A counselor can conduct multiple sessions with different students.

3. Student – ProgressReport:

- **Relationship:** Records Progress
- **Cardinality:** 1 Student → 1 progress reports(1:1)
- **Description:** Each session can have progress reports for the student.

4. Student – Institution:

- **Relationship:** Attends
- **Cardinality:** Many students → 1 institution (1:M)
- **Description:** Each student is associated with an institution.

5. Student – Evaluation:

- **Relationship:** Evaluates
- **Cardinality:** 1 Student → 1 evaluation (1:1)
- **Description:** Each session can be evaluated with rating and feedback.

6. NGO – AwarenessProgram:

- **Relationship:** Organizes
- **Cardinality:** 1 NGO → many programs (1:M)
- **Description:** NGOs can organize multiple awareness programs.

7. Counselor – AwarenessProgram:

- **Relationship:** Organizes

- **Cardinality:** 1 counselor → many programs(1:M)
- **Description:** One counselor can participate in multiple awareness programs.

8. Institution – Funding:

- **Relationship:** Provides Funding
- **Cardinality:** 1 institution → many funding records (1:M)
- **Description:** Institutions provide funding to NGOs for various programs.

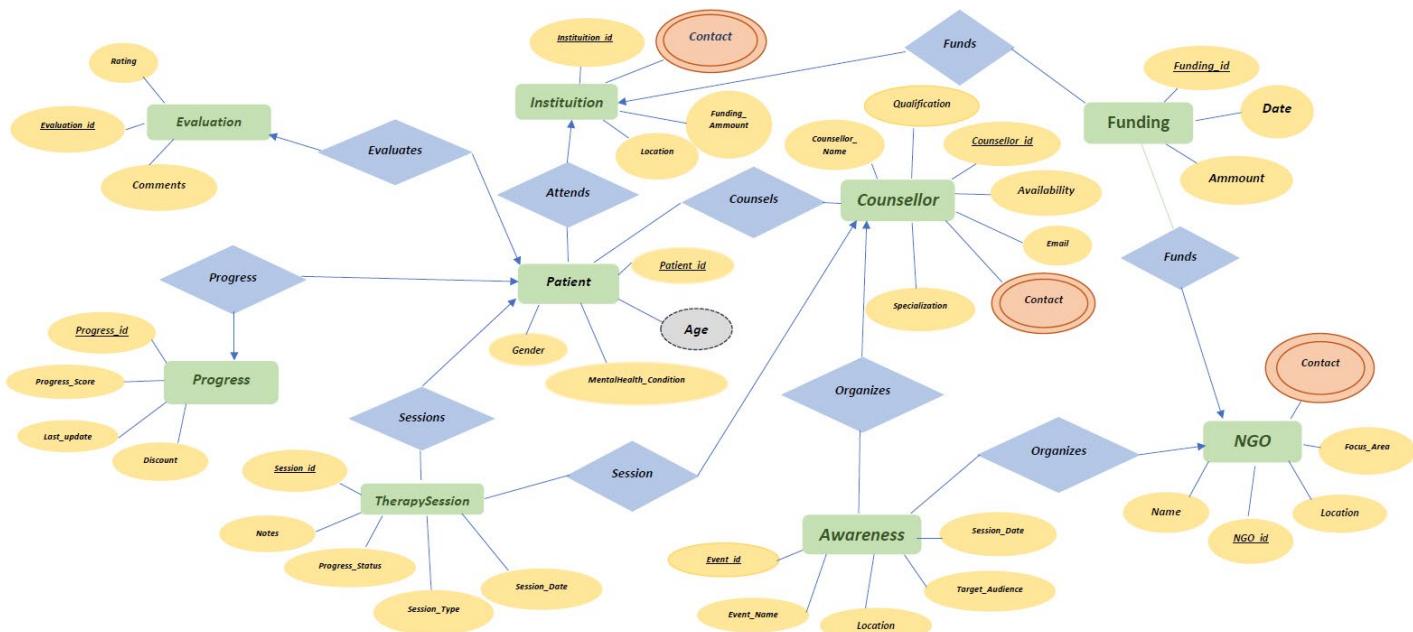

9. NGO – Funding:

- **Relationship:** Provides Funding
- **Cardinality:** 1 NGO → many funding records (1:M)
- **Description:** NGOs receive funding from multiple institutions.

10. Counselor – Student:

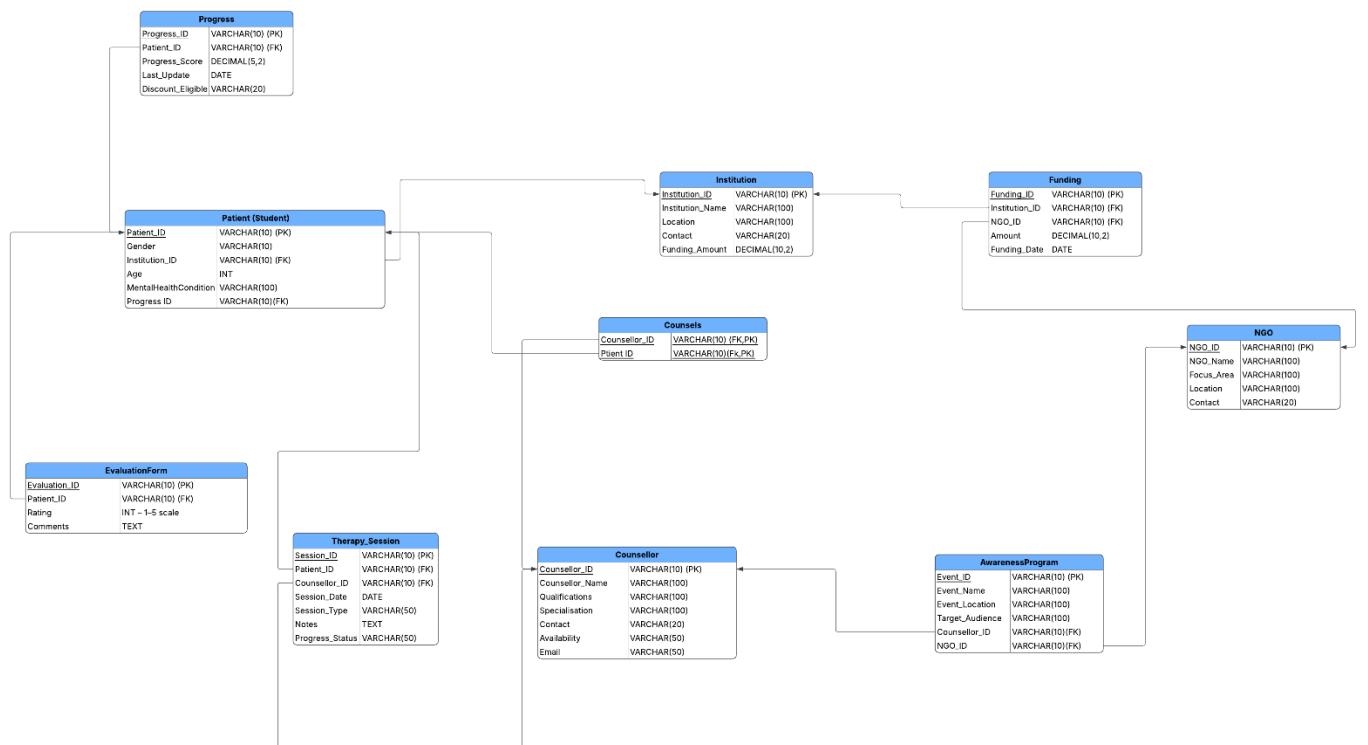

- **Relationship:** Counsels
- **Cardinality:** Many counselors → many students(M:N)
- **Description:** Counselors provide counseling to multiple students, and a student may have multiple counselors.

ER-DIAGRAM

SCHEMA DIAGRAM

The **Mental Health Portal** database schema is designed to manage students, counselors, therapy sessions, progress reports, and evaluations efficiently. It includes tables for Institutions and NGOs, linking them through funding and awareness programs. Relationships such as connect Counsels students with counselors, while Funding links institutions and NGOs to support therapy services. The schema ensures structured, continuous, and confidential mental health care, with modules for tracking progress, session details, and program participation.

QUERIES

01.SELECT * FROM Patient

Record from the Patient table with all columns Shows every and details.

PatientID	InstitutionID	Gender	Age	MentalHealthCondition
P2001	I1001	Female	21	Anxiety
P2002	I1002	Male	22	Depression
P2003	I1003	Female	20	Academic Stress
P2004	I1001	Male	23	Addiction
P2005	I1002	Female	19	Relationship Issues
P2006	I1004	Male	24	Career Confusion
P2007	I1005	Female	22	PTSD
P2008	I1006	Male	20	Anger Issues
P2009	I1001	Female	25	Depression
P2010	I1003	Male	21	Anxiety
P2011	I1002	Female	22	Learning Disability
P2012	I1004	Male	23	Substance Abuse
P2013	I1005	Female	20	Stress
P2014	I1003	Male	22	Suicidal Thoughts
P2015	I1002	Female	19	Grief
P2016	I1004	Male	21	Depression
P2017	I1005	Female	23	Anxiety
P2018	I1006	Male	24	PTSD
P2019	I1001	Female	22	Academic Stress
P2020	I1002	Male	20	Substance Abuse

02.SELECT Name, Specialisation , Qualification FROM Counselor;

Lists each counselor's name, area of specialization, and qualifications.

Name	Specialisation	Qualification
Dr. Rafi Islam	Child Counseling	MSc in Clinical Psychology
Dr. Nusrat Jahan	Family Therapy	PhD in Psychiatry
Dr. Shuvo Rahman	Addiction Recovery	MPhil in Psychology
Dr. Tania Akter	Academic Stress	MS in Counseling Psychology
Dr. Mahmud Hasan	Depression & Anxiety	PhD in Clinical Psychology
Dr. Liza Karim	Career Counseling	MSc in Clinical Psychology
Dr. Shahin Alam	PTSD & Trauma	PhD in Mental Health
Dr. Ruma Sultana	Relationship Issues	MS in Psychology
Dr. Imran Hossain	Substance Abuse	MPhil in Counseling
Dr. Farhana Ahmed	Women's Mental Health	MSc in Clinical Psychology
Dr. Tanvir Chowdhury	Anger Management	PhD in Psychology
Dr. Salma Khatun	Learning Disabilities	MS in Educational Psychology
Dr. Mehedi Hasan	Suicidal Prevention	PhD in Clinical Psychology
Dr. Arifa Akter	Stress Management	MSc in Psychology
Dr. Nayemeh Rahman	Grief Counseling	MS in Counseling Psychology

**03.SELECT SessionID, SessionDate, SessionType, Notes
FROM TherapySession WHERE PatientID = 'P2001';**

Lists all sessions attended by patient P2001 with date, type, and notes...

SessionID	SessionDate	SessionType	Notes
S3001	2025-09-05	Individual	Initial session focusing on anxiety triggers.

04.SELECT Rating, Comments FROM EvaluationForm WHERE Patient_ID = 'P2002';

Shows how patient P2002 was rated and what comments were given in evaluations.

Rating	Comments
3	Needs further sessions for confidence building.

05.SELECT NGO_NAME, Focus_Area, Location FROM NGO;

Displays each NGO's name, what issue they focus on, and where they operate.

NGO_NAME	Focus_Area	Location
Helping Hands	Education	Dhaka
Green Earth	Environment	Chittagong
Food For All	Hunger Relief	Khulna
Health First	Healthcare	Rajshahi
Women Rise	Women Empowerment	Sylhet
Child Hope	Child Welfare	Barisal
Clean Future	Sanitation	Rangpur
Safe Shelter	Homeless Support	Mymensingh
TechForGood	Digital Education	Dhaka
WaterLife	Clean Water Access	Comilla
HopeBridge	Disaster Relief	Narayanganj
GreenLight	Renewable Energy	Gazipur
SkillUp	Vocational Training	Jessore
FeedBangla	Food Security	Bogura
CareBangla	Elderly Care	Pabna
BrightFuture	Youth Development	Feni
SaveNature	Wildlife Protection	Cox's Bazar
MindCare	Mental Health	Tangail
PeaceWorks	Community Building	Naogaon
AidConnect	Emergency Aid	Kushtia

06.SELECT Patient_ID, AVG(Rating) AS AvgRating FROM EvaluationForm GROUP BY Patient_ID;

Groups evaluations by patient and computes each one's average rating.

Patient_ID	AvgRating
P2001	4.0000
P2002	3.0000
P2003	5.0000
P2004	2.0000
P2005	4.0000
P2006	3.0000
P2007	5.0000
P2008	4.0000
P2009	3.0000
P2010	2.0000

**07.SELECT p.PatientID, pr.Discount_Eligible FROM Patient p
JOIN Progress pr ON p.PatientID = pr.Patient_ID
WHERE pr.Discount_Eligible IN ('Yes', 'Partial');**

Lists patients who qualify for full or partial therapy fee discounts.

PatientID	Discount_Eligible
P2001	Yes
P2003	Yes
P2004	Partial
P2005	Yes
P2007	Yes
P2008	Yes
P2009	Partial

08. SELECT * FROM TherapySession WHERE CounselorID = 'C1005' AND SessionDate BETWEEN '2025-09-01' AND '2025-09-30';

Filters all therapy sessions by CounselorID = C1005 and the month of September 2025.

SessionID	PatientID	CounselorID	SessionDate	SessionType	Notes	ProgressStatus
S3002	P2002	C1005	2025-09-07	Individual	Discussed coping mechanisms for depression.	Improving
S3009	P2009	C1005	2025-09-15	Individual	Progress review for depression therapy.	Completed
S3016	P2016	C1005	2025-09-23	Individual	Review of depression medication response.	Ongoing

**09.SELECT i.Institution_Name, SUM(f.Amount) AS TotalFunding
FROM Institution I JOIN Funding f ON i.Institution_ID =
f.Institution_ID GROUP BY i.Institution_Name;**

Adds up all funding amounts grouped by institution name

Institution_Name	TotalFunding
University of Asia Pacific	250000.00
Independent University, Bangladesh	180000.50
BRAC	220000.00

CEP MAPPING (K–P–A)

K – Knowledge			
CEP Component	Code	Attribute	How We Achieved It
Knowledge (K)	K1	Core engineering fundamentals	Applied database fundamentals such as entity creation, primary/foreign keys, normalization, and relationship identification while designing the complete schema.
Knowledge (K)	K2	Use of mathematics, science & IT	Implemented SQL operations using logical conditions, date functions, aggregations, and statistical calculations (average ratings, session counts).
Knowledge (K)	K3	Theory-based modeling	Developed ER diagrams and normalized tables (1NF-3NF) strictly following DBMS theoretical guidelines.
Knowledge (K)	K4	Specialized engineering knowledge	Used advanced SQL concepts (subqueries, ANY/ALL operators, constraints) to build a robust mental-health support database.
Knowledge (K)	K6	Use of modern engineering practices	Created a fully functional database using SQL DDL & DML, maintaining referential integrity and realistic workflow mapping.
Knowledge (K)	K8	Social, ethical & sustainability awareness	Ensured ethical handling of mental-health data by introducing AnonymousID, controlled access, and sustainable funding mechanisms involving institutions and NGOs.

P – Problem Solving			
CEP Component	Code	Attribute	How We Achieved It
Problem Solving (P)	P1	Depth of engineering knowledge required	Designed multiple interconnected entities covering therapy sessions, evaluations, progress tracking, and funding flows.
Problem Solving (P)	P2	Conflicting requirements	Balanced student privacy with counselor availability, institutional reporting needs, and NGO funding constraints.
Problem Solving (P)	P3	Non-routine, abstract problem	Translated real counseling procedures into structured entities like TherapySession,

			Progress, Evaluation, and Awareness Program.
Problem Solving (P)	P5	Multiple stakeholders involved	Considered requirements of students, counselors, academic institutions, and NGOs in one unified database.
Problem Solving (P)	P7	Large, interconnected problem scope	Built a system with 6+ linked tables representing scheduling, therapy, evaluation, notifications, and funding processes.

A – Activities

CEP Component	Code	Attribute	How We Achieved It
Activities (A)	A1	Use of diverse resources	Integrated sessions, personal data, counselor information, progress updates, and NGO funding within a single system.
Activities (A)	A2	Coordination of complex interactions	Managed dependencies between Student-Counselor mapping, funding distribution, progress updates, and evaluations.
Activities (A)	A3	Innovation & practical application	Implemented anonymous identity tracking, subquery-based insights, and a modular design linking therapy, progress, and funding.
Activities (A)	A4	Societal and ethical responsibility	Designed the system to promote student well-being, data confidentiality, and long-term accessibility through institutional and NGO support.

FUTURE IMPROVEMENT

- Web-Based Portal Development:** We aim to build a user-friendly online platform for students and counselors to access the system remotely.
- Automated Scheduling & Notifications:** We plan to implement automatic session scheduling and reminders to improve engagement for both students and counselors.
- AI-Driven Psychological Trend Analysis:** We envision using AI to analyze therapy data, detect mental health patterns, and provide personalized recommendations.

4. **Real-Time Counselor-Student Chat Support:** We want to enable instant messaging so students can get guidance and support between sessions.
5. **Mobile App Integration:** We intend to develop a mobile application for easy access to sessions, progress tracking, and awareness programs.
6. **Encryption for Sensitive Records** We will ensure student mental health data is secure through end-to-end encryption and strict privacy controls.

CONCLUSION

In this project, we developed a Mental Health Portal database to support students' psychological well-being. The system manages students, counselors, therapy sessions, progress reports, evaluations, institutions, NGOs, and awareness programs efficiently through a well-structured relational schema and normalized tables.

By designing ER diagrams, implementing relationships, and writing complex queries, we ensured secure data handling, accurate progress tracking, and meaningful reporting. The project enhanced our knowledge of database concepts, SQL skills, and practical problem-solving, while also emphasizing ethical management of sensitive information.

Overall, the Mental Health Portal provides a foundation for future improvements such as web and mobile access, automated scheduling, AI-driven analysis, and real-time counselor-student support, ensuring accessible, continuous, and secure mental health care for students.
